M.A.B. Safety Workshop

Self-Assessment Summary

Total number of participants: 16

The purpose of these surveys was for the participants to **self assess** their exposure to verbal aggression, threatening behaviours and physical assault, as well as rate their knowledge and confidence to manage aggressive behaviours.

At the close of the session, the participants were asked to complete a five (5) question checkbox survey.

Reviewing the difference in self assessment after the session as compared to before the session will assist you to measure the impact of the session for the participants.

Please feel welcome to contact us to discuss the *Self-Assessment Survey* .

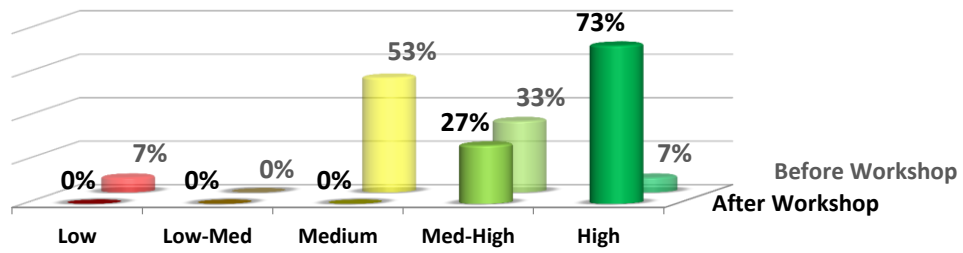

Kind regards,

The Team at Holland Thomas
